SKILLS

Languages: C, C++, Java, JavaScript, HTML, CSS, Sass, Groovy, MATLAB, VHDL, SQL

Frameworks & Libraries: Node.js, Vue.js, Express, MongoDB, Angular, Bootstrap, Jquery, MySQL, CouchDB, PouchDB, Ionic, React

UI/UX: Zeplin, Sketch, Adobe Photoshop, Adobe Experience Manager(AEM), Invision, ON1

Others: Git, Docker, Solr, JSON, JIRA, Agile Methodologies, Webpack, Junit, SOAP, RESTful, Jenkins

AWARDS

University of Waterloo ·
Engineering International Student Scholarship
· Extraordinary overall performance, awarded to **20** international students

University of Waterloo ·
President's Scholarship of Distinction
· Obtaining an overall incoming average above **95%**

UXP Systems ·
Certified Scrum Team Member

EDUCATION

University of Waterloo
Computer Engineering, Honours, Co-operative Program 2020
Relevant Courses
·Computer Networks ·Operating Systems · Data Structures and Algorithm · Database Systems · Project Management · Compilers · Digital Systems Engineering

ACTIVITIES

Hackster's Club
·Assisted in hardware design for a drone implementation

Mathematics blog
· guninkhannamathematics

EXPERIENCE

International Financial Data Services (IFDS) · Toronto, ON
Full Stack Developer · Apr. 18 to Aug. 18
- Architected and developed a cross-platform **Ionic** application to automate the process of registering and dispatching posts using **Angular**, **Node.js** and **CouchDB**
- Improved the workflow by **88%**, eliminating **4 hours** of manual effort a day
- Reduced the number of **web-sockets** from **6 to 2** by redesigning the database schema
- Solely developed a sign-in application to track user activity using the **MEAN** stack
- Secured the applications by a **JWT-auth** server and deployed via **Nginx** reverse proxy

Great-West Life · Toronto, ON
Software Developer · Sept. 17 to Dec. 17
- Built multiple *data visualization* components that dynamically load data from a complexly structured data-set using **Vue.js**, **Docker**, **Solr** and **SQL**
- Improved asset retrieval and upload to *Java Content Repository* by **18%** using **Java**
- Worked closely with *business*, *content* and *design* teams to develop cross-platform **AEM** components to be used across all products using **Java**, **Javascript,** and **XML**

UXP Systems · Toronto, ON
Automation Developer · Jan. 17 to May 17
- Implemented **SAML** login and authentication using **Java** for **3.2 million users**
- Improved the automotive test coverage by **35%** using **Java**, **TestNG,** and **Selenium**
- Built a CD pipeline automating deployments on client environments using **Jenkins**

SOTI Inc · Mississauga, ON
QA Analyst · May 16 to Sept. 16
- Identified abnormal consumption patterns and assisted the team to decrease battery consumption for Android users by **16%**
- Integrated RESTful API testing using **SoapUI** and **Python**, on multi-OS for geo-restrictions, lockdown and security

PROJECTS

Spore | Java, Node.js and MongoDB
- Organizational tool for students to manage their time better
- Implemented a **parser** to intelligently read critical dates from the course outline and **export** it to local/third party calendar i.e shareable with friends
- Integrated university specific login and a native chat system to allow students to share documents, create study groups, events and view public calendars

MyTunes | React, Node.js, and Spotify
- Allow users to sign in with **Spotify** using **OAuth** to create **curated workout playlists** from **35 million** songs based on *BPM*, *energy*, *artists*, *genres,* and *duration*
- Integrated the **Spotify API** to remove duplicate songs across all user playlists

Detect-It | VHDL, FPGAs
- Implemented **Kirsch edge detector** algorithm in **VHDL** to detect edges by identifying an abrupt change in the brightness for each pixel.
- Optimized the algorithm by using **overlapping pipelining** for the Dataflow analyses
